

REMARKS

In the Office Action, the Examiner rejected claims 1-3, 6-18, 20 and 20-27 and objected to claims 4, 5, 19, 21, and 28. By this paper, the Applicants cancelled claims 4, 19, 21, and 28, added new claims 29-55, and amended claims 1, 11, 20, and 22. As discussed below, these amendments and new claims incorporate allowable subject matter into the claims, do not add any new matter, and require no new search. Upon entry of these amendments, claims 1-3, 5-18, 20, 22-27, and 29-55 will be pending in the present application and are believed to be in condition for allowance. In view of the foregoing amendments and the following remarks, the Applicants respectfully request allowance of all pending claims. The Applicants also reserve the right to pursue the original claimed subject matter and other disclosed subject matter in one or more continuing applications.

Allowable Subject Matter

The Applicants gratefully acknowledge the Examiner's recognition of allowable subject matter. In the Office Action, the Examiner indicated that dependent claims 4, 5, 19, 21 and 28 include allowable subject matter and, thus, would be allowable if rewritten in independent form. While the Applicants do not agree with the present rejections, in a good faith effort to expedite prosecution, all pending claims in the current application incorporate allowable subject matter.

The Examiner admitted that "the prior art fails to show that the top structure comprises a plurality of heat transfer structures or that the top structure comprises a pivot structure that is pivotally mountable to the base structure or that the bendable arcuate mount comprises a plurality of heat transfer structures." Office Action mailed on March 21, 2005, p. 3. In view of the amendments and new claims set forth above, the application includes eight independent claims: 1, 11, 20, 22, 29, 38, 47, and 49, each of which includes allowable subject matter as summarized below.

Amended independent claim 1 includes the allowable subject matter of dependent claim 4, and recites, *inter alia*: “wherein the top structure comprises a plurality of heat transfer structures.” Amended independent claim 11 includes the allowable subject matter of dependent claim 19, and recites, *inter alia*: “wherein the bendable arcuate mount comprises a plurality of heat transfer structures.” Amended independent claim 20 includes the allowable subject matter of dependent claim 21, and recites, *inter alia*: “means for transferring heat from the computer drive.” Amended independent claim 22 includes the allowable subject matter of dependent claim 28, and recites, *inter alia*: “wherein securing comprises contacting a plurality of heat transfer structures.”

The new independent claims 29, 38, 47, and 49 all recite the allowable subject matter of dependent claim 5 in context of the respective claim. New independent claim 29 recites, *inter alia*: “wherein the top structure comprises a pivot structure that is pivotally mountable to the base structure.” New independent claim 38 recites, *inter alia*: “wherein the bendable arcuate mount comprises a pivot structure that is pivotally mountable to a base structure.” New independent claim 47 recites, *inter alia*: “means for pivoting the means for bendingly compressing.” Finally, new independent claim 49 recites, *inter alia*: “wherein the top mount structure comprises a pivot structure that is pivotally mountable to the base mount structure.”

In view of the Examiner’s statement concerning allowable subject matter, the Applicants submit that the foregoing amended and new independent claims are currently in condition for allowance. Accordingly, the Applicants respectfully request the Examiner withdraw the outstanding rejections and allow all pending claims.

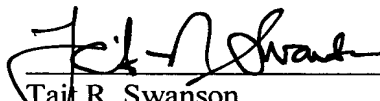

Serial No. 10/698,560
Amendment and Response to Office Action
Mailed March 21, 2005

Conclusion

If the Examiner wishes to resolve any remaining issues by way of a telephone conference, the Examiner is kindly invited to contact the undersigned attorney at the telephone number indicated below.

Respectfully submitted,

Date: June 20, 2005
